TOPWELL- APOTHEKEN AG

Die Topwell-Apotheken AG: wo traditionelle Werte auf Dynamik treffen

Wir stehen für die kompetente Beratung unserer Kunden sowie für die Gesundheitsförderung in der ganzen Schweiz.

Wir positionieren uns als ganzheitliches Dienstleistungsunternehmen im Gesundheitswesen und betreiben eigene Offizinapotheken/ Drogerien, unter anderem mit eigener Herstellung.

Gemeinsam zum erfolgreichen Studienabschluss oder ein Berufseinstieg mit Perspektiven

Wenn Sie ein spannendes, herausforderndes und lehrreiches Umfeld für Ihr Assistenzjahr oder den Berufseinstieg im Anschluss an Ihr Studium suchen, dann freuen wir uns, Sie kennen zu lernen.

Im Sinne einer gezielten Nachwuchsförderung erhalten Sie bei uns die Möglichkeit, sich fachlich und persönlich weiterzuentwickeln und die daraus resultierenden Perspektiven wahrzunehmen.

Mit Ihrer Persönlichkeit und Ihrem Fachwissen machen Sie den Unterschied, damit sich unsere Kunden kompetent beraten und rundum wohl fühlen. Werden Sie Teil der Topwell-Familie und bewerben Sie sich noch heute bei uns.

Apothekerin Anne Laurence Noyer
Dr. Noyer Rotpunkt Apotheken Bern

Die Rotpunkt Gruppe bietet Lösungen für Jungunternehmer.

Wollen Sie Ihre eigene Rotpunkt Apotheke führen?

Die Rotpunkt-Pharma AG wurde von selbstständigen Apothekern für selbstständige Apotheken gegründet. Wir unterstützen heute über 100 unabhängige Apotheken in Marketing, Weiterbildung und Einkauf mit dem Ziel, deren Stellung im Markt zu stärken, damit sie fit sind für die Zukunft. Durch die Bündelung der Kräfte sichern wir den Rotpunkt Apotheken auch die Position als wichtiger und verlässlicher Partner im Markt, ganz besonders für unsere Kunden in der Apotheke.

Chance als Jungunternehmer

Mit der Tochtergesellschaft Vitopha AG unterstützen wir Jungunternehmer mit dem Ziel, die Apotheke selbstständig zu führen und die Apotheke Schritt für Schritt zu erwerben, ohne dabei das finanzielle Risiko der Verschuldung eingehen zu müssen.

Gestalten Sie Ihre Zukunft mit Rotpunkt. Neugierig und interessiert?

Gerne zeigen wir Ihnen in einem unverbindlichen Gespräch die Chancen und den Nutzen der Rotpunkt Gruppierung für junge ApothekerInnen mit unternehmerischem Instinkt auf.

Melden Sie sich bei uns für ein persönliches Gespräch per Mail oder Telefon.

Welcome Word

Welcome to the Career & Networking Days 2018!

It is our great pleasure to welcome you to the first-ever Career & Networking Days. This event is not just a continuation of an old tradition, it is also the reconsideration of what has always been at the very core of the traditional Seminarweek: We, the students. It is about highly relevant topics for our future regarding both scientific and medicinal aspects. It is about our future perspectives in both pharma industry and public pharmacies. And most importantly, it is the event for you to spend time together, to enjoy the kind of long-lasting memory you look back to and go «Remember those days in Interlaken?».

The tradition of the former Seminarweek lives on in our partnership with the Hotel Carlton Europe and the numerous loyal sponsors. Therefore, we are deeply grateful for all the support we received by them and hope to have created a new event ensuring the support for many years to come.

We are very much looking forward to three outstanding days with fascinating speakers, captivating subjects, phenomenal cuisine, great networking opportunities and most of all, a unique experience. These are the Career & Networking Days 2018!

Yours sincerely,

Your organizing committee

Keynote Lecture: Career Building

Thursday 26.04.2018, 12.30-13.30

You're just about to finish your studies and can't wait to enter the business world? Be prepared! The business world is large and there are countless job possibilities. But which skills do you need for your dream job and what further educations are useful? How can you stand out of the crowd to get the most attention from your future employer? Our guest speaker Melvin Olson will answer you these questions and many more!

Skip Olson is currently the Global Head of real-world data (RWD) Strategy and Innovation at Novartis. As such, he is responsible for promoting the very best in research methodology and applications of Real World Data across all therapeutic areas to drive better decision making. He has a background in Health Economics & Outcomes Research (HE&OR) where he has led the use of real world-evidence (RWE) to transform the generation of patient insights and value for money assessments. Skip is a member of the Institutional Council of the International Society for Pharmacoeconomics and Outcomes Research (ISPOR).

He obtained a PhD in Biostatistics at Harvard University and has worked for a dozen years as a clinical statistician in the pharmaceutical industry.

Career Workshop

Friday, 27.04.2018, 09.00-10.00

Am I dressed properly for an interview? Shall I mention my hobbies in the CV? What salary proposition shall I make to my interviewer?

The large step into the business world is not too far ahead. Dr. Volker Herdtweck will give you a deeper insight into what really matters in your CV, interview training and many more aspects for job applications in “Big Pharma”. You will get hand-on tips and tricks to show future employers your full spectrum of competences.

This workshop also gives you the unique opportunity to meet up with an experienced employer from one of the most successful pharma companies worldwide. Take the chance and ask all the questions you are burning for!

LimmaTech Biologics

Friday, 27.04.2018, 11.00-12.00

LimmaTech Biologics AG is a clinical stage biopharmaceutical company focused on the development and manufacture of next generation bioconjugate vaccines. The spin-off was founded in 2015 following the acquisition of GlycoVaxyn AG by GSK. LimmaTech actively explores applications of glyco-engineering and protein glycosylation in several fields and exclusively develops new vaccines for GSK.

Michael Kowarik is the Vice President Business and IP Strategy and responsible for the identification and development of vaccine candidates through their early stages. He also manages the intellectual property strategy and development at LimmaTech.

He co-invented a platform technology for protein glycosylation during his postdoc. The platform became the core of Glycovaxyn's vaccine development franchise and was acquired by GlaxoSmithKline in February 2015. Michael has a PhD in Biochemistry from the Swiss Federal Institute of Technology, Zurich (ETH Zurich). He has authored several peer-reviewed publications and is an inventor of several granted patents establishing the scientific framework of the bioconjugation technology.

Panel Discussion GSIA

Friday, 27.04.2018, 14.00-15.30

The Swiss Society of Industrial Pharmacists (GSIA), founded in 1956, is an organization for academic professionals with a background in life-sciences in pharmaceutical industry. GSIA organizes events for their members for networking purposes within the pharmaceutical industry. Furthermore, the association organizes educational programs with special and current topics.

Toni Widmer did an extramural PhD-thesis in a co-operation between Novartis and the University of Würzburg on drug-like molecules of low solubility. Afterwards, he became an external formulation expert for nanoparticulate formulation & solid dispersion for a year. He's holding a position as Senior Scientist in preclinical development for three years at Novartis.

Medical/Regulatory Affairs

Friday, 27.04.2018, 16.00-17.00

Lisa Astfalck studied pharmacy at the ETH Zurich (2005-11) and successfully finished her studies with the federal diploma as certified pharmacist. She entered the field of Regulatory Affairs and Quality Assurance with a pharmaceutical consulting enterprise after having gained two years of working experience in public pharmacies. In 2015, she was hired by AstraZeneca AG as responsible person for Medical Information/Patient Safety Management and Advertising Materials. She was promoted to Regulatory Affairs Manager in September 2017.

Make your mark. Improve lives.

At Roche, our success is built on innovation, curiosity, and diversity – multiplied by 91,747 professionals in 100 countries. By challenging conventional thinking, and challenging ourselves, we've become one of the world's leading research-focused healthcare groups, and one of the most exciting and openminded places to advance a career.

To innovate healthcare, we're constantly learning and growing – and seeking people who have those same goals for themselves. You're someone who wants to influence your own development. You're looking for a company where you have the opportunity to pursue your interests across functions and geographies.

Here at Roche, we are always interested in connecting with great scientists in engineering, natural sciences and information technology. Take part in one of our internship or traineeship programs, or apply for one of our entry level positions.

Start your career now!

Swiss expertise in phyto-pharmaceuticals since 1864

Max Zeller Söhne AG
8590 Romanshorn
Switzerland
www.zellerag.com
info@zellerag.ch

zeller 

From seed to patient

Zeller is a leading company in developing, manufacturing and distributing evidence-based phyto-pharmaceuticals with highest quality standards in Switzerland.

Controlled quality over the entire value chain: Zeller has control of all processes, from cultivation of the medicinal plants up to the production of the finished packaged product.

The extraction and subsequent treatment of the extracts to manufacture the final medicinal form take place according to GMP. For the documentation of our products, Zeller implements pre-clinical and clinical trials, which are published in internationally recognised journals. Guaranteeing control of the entire value chain requires long-term investments in infrastructure. We are committed to Switzerland as our home market and are consequently investing for the future in Romanshorn and Uttwil.

The Pharmacist's Role in Epidemiology

Saturday, 28.04.2018, 08.30-10.00/10.30-12.00

Pharmacists are in the privileged position to be at the very base of epidemiological data and its outcome, directly at the patient. This workshop will introduce you into the principles of public health, the measures available in Switzerland and practically relevant applications of public health approaches.

Furthermore, a practical example will conclude this workshop showcasing the importance, potential and tools available to pharmacists in epidemiology and public health.

Dr. med. Rolf Heusser is director of the National Institute for Cancer Epidemiology and Registration (NICER) of Switzerland.

Following his post-graduate studies at the University of California, Berkeley, he developed a broad and highly-specified expertise in public health for more than 20 years.

Furthermore, he is also highly invested in the educational programs in public health jointly offered by the universities of Basel, Berne and Zurich. He has won four times consecutively the award for best teacher in the master program.

Cannabis in the Pharmacy

Saturday, 28.04.2018, 08.30-10.00/10.30-12.00

Cannabis has been experiencing a revival for therapeutic purposes in recent times. However, prescription of cannabinoid drugs faces numerous political and regulatory restrictions, thus reducing its potential medical applications. The Bahnhof Apotheke in Langnau currently holds the single permission to sell cannabis in form of oils and tinctures for medical use in Switzerland. The pioneering pharmacy developed experience in the medical use of cannabinoids in the last years with the treatment of over 3000 patients.

Daniela Eigenmann studied pharmacy in Berne and Basel and obtained her PhD in pharmaceutical biology at the university of Basel in the group of Prof. Hamburger. She holds the position of deputy pharmacist for the production and selling of cannabinoids drug at the Bahn-hof Apotheke in Langnau.

Panel Discussion FPH Offizinpharmazie

Saturday, 28.04.2018, 13.00-14.30

The change in the Medizinalberufsgesetz (MedBG) introduced for the first time the obligation for post-graduate educational programs for pharmacists. Though plans for such programs have been discussed vividly in the last years, concrete information is both sparse and contradictory. Thus, we have invited vice-president Peter-Michael Burkard from pharmaSuisse and Florian Sarkar from the Swiss Young Pharmacists Group (YPG) to our panel discussion.

Peter-Michael Burkard studied pharmacy at the ETH Zurich and graduated with the federal diploma in 1987, followed by an FPH Offizinapotheke in 2004. Currently he works as an independent pharmacist in Chiasso. He is vice-president of pharmaSuisse and responsible for the education of pharmacists, including the assistance year and famulatur. Furthermore, he is member of the administrative board of Axapharm AG and the federal examination council of the BAG.

Florian Sarkar graduated from pharmacy school at the university of Basel in 2009 and started to work at his parents' community pharmacy in Balsthal. In 2010, he joined the executive committee of swissYPG because he wanted to share his visions about the future role of pharmacists in the health care system.

SwissYPG encourages young pharmacists to proactively shape their career and commit to the change that awaits our profession. Their main activities are the exchange with pharmaSuisse and asef, the organisation of events such as the Forum Pharmazie and their biennial symposium and other projects such as the exchange with the young family doctors (JHaS).

Medical Information Is not a Monopoly

Saturday, 28.04.2018, 15.00-16.00

Zeno Davatz has been CEO of the IT-enterprise ywesee GmbH for 18 years. The company specifically build up an expertise in the analysis of re-levant data associated with our healthcare system. His deep conviction for the application and generation of OpenSource software led him originally to cut down on the illegal monopoly of Documed (editor of 'Compendium') in a long lasting legal fight. This case shaped the future of his company drastically and ended in the invention of a new app he will be presenting to you.

Interlaken

Interlaken is located in canton Berne and lies between the Lake of Thun and Brienz which are connected by the river Aare. Additionally, Interlaken is surrounded by the world-famous three mountains Eiger, Mönch and Jungfrau.

Since the 19th century, Interlaken has been a tourist destination and has been visited by famous people like Johann Wolfgang von Goethe and Felix Mendelssohn Bartholdy. The completion of the Bernese Oberland Railway 1890 and the Jungfrau Railway in 1912 further encompassed Interlaken's development into one of Switzerland's top traveling destinations.

Today, Interlaken is the starting point for various excursions and provides more than 45 mountain railways, cable cars, chair lifts and ski lifts to 200 kilometers of pistes and a dense network for hiking.

Accommodation

The Hotel Carlton-Europe has more than 100 years of hospitality tradition and is located at the center of Interlaken only a few meters away from the train station „Interlaken Ost “. Its location is ideal for excursions to the Jungfrau region and to the lakes of Thun and Brienz. All hotel rooms are equipped with a TV, radio, free Wi - Fi and a safe. The hotel offers a Wellness area (Oberländer Wellness Dörfli) with a Finnish Sauna, a Bio-Sauna and vapor-bath. Special showers as well as a water bath ensure refreshment, a rest area with deck chairs awaits you for relaxing moments. Since spring 2015, there is a natural swimming pond in the hotel garden. A choice of restaurants serves either typical Swiss dinner (Restaurant Chalet Beizli), traditional barbecue specialities (Johnny’s Pub and Grill) or spices from far east (Restaurant Shalimar). “Le connaisseur du vin” finds himself best suited at the „ Caveau de l’Europe “ . Large seminar rooms for up to 180 people are available with modern equipment and daylight.
